

# Confined Space Rescue Technician Class aboard the Battleship New Jersey BB-62

NSR Solutions and Med-Tex Services, Inc. are proud to introduce a Confined Space Rescue Technician Class aboard the Battleship New Jersey BB-62. This program will begin with the basics of confined space rescue and increase quickly to advanced vertical and horizontal entries. This program will challenge the student to think outside the box and utilize critical thinking skills. Students will have to navigate through tight horizontal and vertical openings, bulkhead doors, and small vertical ladders to name a few. Many of these scenarios will require multiple anchors, rigging and change of directions that may not necessarily be found in standard confined space training props. The training areas that will be used are off limits to visitors and student will get unique access to the ship. In this program, scenarios will involve boiler rooms, bulges, bulkheads, walkways and the final evolution will be a casualty lower from atop the radar tower super structure. Following the lower, students will rappel from atop the ship onto the main deck. This course is customized to reflect real world challenges and to ensure the rescue process and obstacles are effectively managed. The focus of the classes will be on confined space rescue operations but the principles covered will apply to a wide range of rescue scenarios for emergency response and industrial applications. Students may also choose to sleep on the ship for the week of the course to avoid the daily driving. This unique opportunity is available at a reduced rate. See below for further.

This program exceeds the intent of the following standards and regulations.

- NFPA 1006-2013 Edition: *Standard for Technical Rescuer Professional Qualifications*, Chapter 7; Confined Space Rescue Level's I and II
- NFPA 1670-2014 Edition: *Standard on Operations and Training for Technical Search and Rescue Incidents*: Chapter 7; Confined Space Search and Rescue (*Applies to members attending from the same department/team*)
- OSHA 29 CFR 1910.146 Permit Required Confined Space (PRCS)

Topics in this program include:

- ✓ Equipment Tool Lab
- ✓ Confined Space Permits
- ✓ Air Monitoring & Ventilation
- ✓ Supplied Air Systems
- ✓ Ropes & Knots, Rigging & Simple Mechanical Advantage Systems
- ✓ Tri Pod Operations
- ✓ High Directional Anchors
- ✓ Field Rigging for Rescue
- ✓ New Technology and much more.

- **Course Pre-requisites:** Must be 18 yrs of age and have previous Rope & Confined Space Training
- **Course Dates:** Monday, April 10 to Thursday, April 13, 2017 8:00am to 4:00pm (32hrs)
- **Location:** Battleship New Jersey Museum and Memorial  
100 Clinton St, Camden, NJ 08103
- **Price:** Early bird registration February 10 to March 15 is \$675.00 per person. After March 15 is \$695.00. Registration includes morning snacks & drinks and lunch on all four days
- **Lodging:** \$150.00 for the four days of the program
- **Student Equipment:** Duty or rescue uniform suitable for confined space operations, Rescue helmet w/ headlamp, NFPA class III harness, safety footwear, and gloves. Equipment and PPE may be subject to inspection by the instructions.

### **Confined Space Technician Class aboard the Battleship New Jersey BB-62 Registration Form**
